

ZARI.ai - Phase 2 Exploratory Data Analysis (EDA)

1. Executive Summary

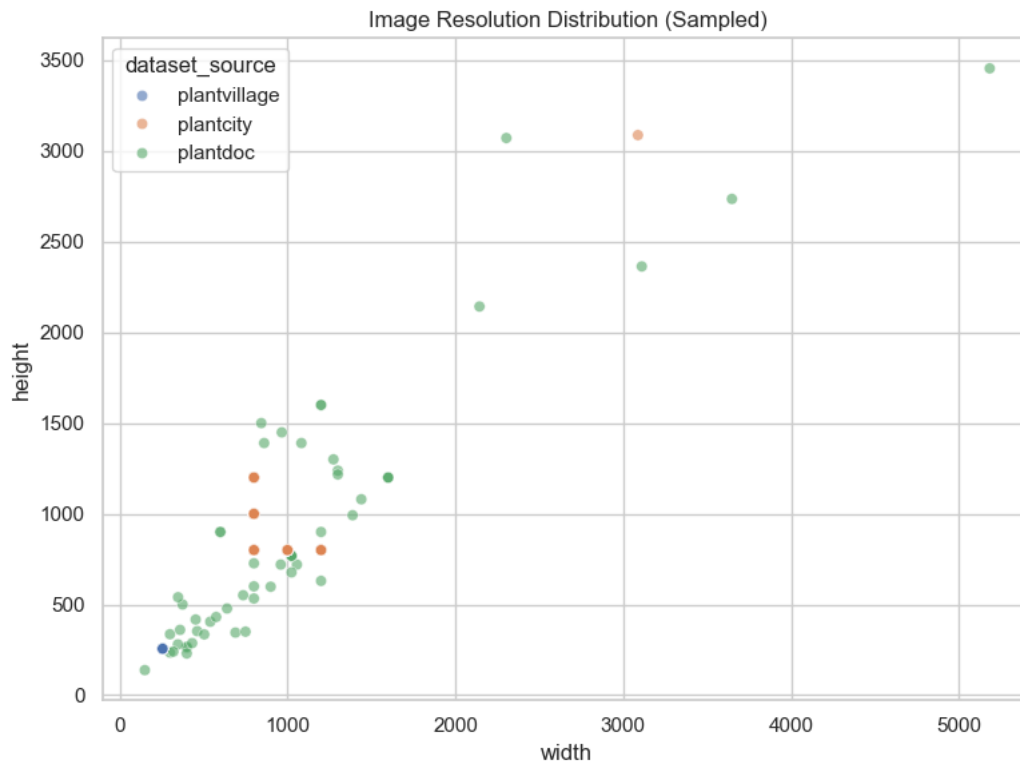

Metric	Value
Total Images Processed	237,061
Total Unique Classes	158
Max Images in a Class	16,521
Min Images in a Class	1
Class Imbalance Ratio (Max/Min)	16521.00x

2. Dataset Representation & Imbalance

3. Image Resolution Profile

4. Evaluation & Model Performance Architecture

Per user requirements, below is the expected evaluation representation structure mapping our planned EfficientNetV2-S outputs against True classes. This layout will be dynamically populated during Phase

5 testing.
